

July 2013

This newsletter covers changes and enhancements for the second half of the school fiscal year: January 2013 to July 2013

As of Fall 2013, Utah has a total of 42 school districts and approximately 85 charter schools.

- SIS2000+ users requested an application to track student academic progress from year to year. This application will help in monitoring student progress academically and show what intervention was successful for a student's progress and what intervention didn't help. All involved personnel can access and use this information to help a student improve academically from year to year.
- New Mobile Web Pages for Mobile Devices for teachers to access student attendance when away from the classroom.
